Queensheba Oluwadare

oluwadarequeensheba@gmail.com | +2349165643535 | Abuja, Nigeria | https://ayaobasheba.netlify.app

Front-end developer with over 2 years of experience specializing in React JS and JavaScript. Proven track record of collaborating with cross-functional teams to develop user-friendly websites and applications. Recently expanded expertise in AI and large language models, with hands-on experience in building a company-specific chatbot using advanced methods. Adept at problem-solving, driving new ideas, and upholding agency standards.

Work Experience

Shelter smart | Lead front-end developer
May 2023 - Present / Remote part-time

- Leading the front-end development team in creating a cutting-edge remittance web platform using
- React JS and Tailwind CSS.
- Collaborating with back-end developers, designers, and stakeholders to design and implement user-
- friendly interfaces and functionalities.
- Ensuring code quality and performance optimization through regular reviews and testing.
- Integrating APIs and implementing user authentication for a seamless user experience.
- Preparing for the product launch by conducting thorough testing, bug fixing, and performance enhancements.

Manaknight Digital | Front-end developer
October 2023 – January 2024 / Remote

- Played a pivotal role in developing a wireframe tool that enables users to design and export fully functional web and mobile applications.
- Contributed to building the tool's functionality, including adding features, linking APIs, implementing authentication, and ensuring code quality.
- Utilized React JS and Tailwind CSS to generate code for web applications, as well as Kotlin, Java, and Swift for Android and iOS projects.
- Enhanced the tool's UI and optimized the tool's performance, resulting in a 10% reduction in load time for the tool.
- Conducted thorough testing of the tool, identifying and logging bugs, and collaborating with the team to implement fixes.
- Developed features for generating Android projects, leading to a 40% improvement in project delivery time for Android app development.

Projects

Liberation Note – Software developer

- Spearheaded the development of Liberation Notes, a cutting-edge social media web application, using React, Tailwind CSS, and Firebase.
- Orchestrated end-to-end implementation of user authentication, ensuring secure registration and login through Firebase Authentication.
- Developed a sophisticated private messaging system, facilitating seamless one-on-one communication between users within the app.
- Created an innovative and dynamic user experience, enabling seamless post-composition, editing, and deletion with text, images, and expressive emojis.

- Enhanced user connections through dynamic features like post liking, commenting, and private messaging, fostering engagement and interaction. Engineered a flexible content-sharing platform, allowing users to curate their online presence through private or public posts.

Musica – Software developer

- Developed Musica, a responsive music player app, utilizing React, Tailwind CSS, and local storage.
- Seamlessly integrated Spotify API for user authentication and access to personal libraries and playlists.
- Engineered an intuitive playback system, empowering users to effortlessly control their music experience with play, pause, shuffle, and navigation features, ensuring they can enjoy their favorite tunes exactly as desired.
- Implemented robust search functionality for discovering a wide range of music and artists.
